- ODOO

LANGUAGES

ESPAÑOL (Nativo)
INGLÉS

TRAINING

UNIVERSITY OF INFORMATION SCIENCES
(2022 - 2026)

Bachelor's Degree in Computer Engineering

ABOUT ME

I am a web developer with four years of experience building a wide variety of projects, utilizing technologies such as Django, NestJS, PostgreSQL, Tailwind, ReactJS, Angular, and Odoo—driven by a strong passion for learning something new every day and achieving new milestones.

EXPERIENCE

JuvoMOS

https://juvomos.com

(January 2025 – Present)

- Development of an administration platform (back-office) to optimize operational efficiency in restaurants.
- Implementation of real-time dashboards and consolidated reports using Angular and Redux.
- Successful integration of the system with POS, Kiosk, and Online Sales ecosystems.
- Active participation in the development lifecycle of the online sales system and hybrid applications using Ionic.

Reserva INC

https://reservaerp.com

(December 2022 – January 2025)

- I led the development of comprehensive applications, utilizing React for dynamic user interfaces and Django for robust, scalable backend architectures.
- I implemented Artificial Intelligence solutions, integrating AI models to automate internal processes and enhance the end-user experience.
- I developed and customized modules within Odoo, aligning the company's business processes with efficient ERP management.
- I designed advanced web scraping tools for the mass extraction and processing of data, facilitating market intelligence and decision-making.
- Technologies: React, Django, Python (Odoo), AI Integration, Web Scraping.

FreshShop

https://freshshopclient.onrender.com

(April 2021 – November 2022)

I participated in the development of an e-commerce platform for food sales. In this project, I developed a user authentication system, an administration panel, payment gateways, a shopping cart, a purchasing system, and a search engine. The system was uploaded to GitHub and is currently operational.
